*Your source of superior carcass seedstock for your future or those who feed your cattle

“BEST OF BREED”

Congratulations to John Brethour and his staff at the KSU Agricultural Research Center in Hays on the winning the “Best of Breed” Contest.

Kansas State University (KSU) Ag Research Center-Hays (ARCH), Hays, Kan., won the \$100,000 prize with an entry of 80 steers from registered Angus bulls worth an average of \$132.05/cwt. of carcass.

Cattle in the KSU-ARCH entry **graded 100% Choice, with 91% qualifying for Certified Angus Beef*, including 32% Prime.** They were 31% YG2's and with no YG4 carcasses. Seventy-five percent of this 78 head entry was comprised of steers produced from the research center cow herd, the Roy Soukup Ranch and the Bettenbrock Ranch, using 8 different sires bred at Green Garden Angus.

YOU CAN HAVE IT TOO!

The genetics that were used to produce the set of steers that won the “Best of Breed” contest will be available in our 44th Annual Production Sale, along with some we think are even better.

In 1983, we implemented a program of stacking pedigrees to create a calving ease product, using the 18th century concept of breeding “Like begets Like”. In 1987, using this same breeding philosophy, our quest began to improve the final product composition of our seedstock. **This emphasis has resulted in seedstock that calve easy, grow rapidly to market weight and hang up a superior carcass.**

Plan on joining us for our

44th Annual Production Sale

Monday April 7, 2003 1:00 P.M. at the farm 1 1/2 mile south of Lorraine, KS
SELLING: 166 HEAD

86 Performance Tested Bulls

46 Fall Yearling Bulls
40 Spring Yearling Bulls

The 86 bulls selling have an average IMF EPD of +.31, putting them in the top 3% of the breed.

80 Superior Females including:

11 Spring 2 year olds with calves
34 Spring cows with calves
5 Fall Bred 2 year olds with calves
30 Fall Bred Cows with calves

Sires Represented:

N Bar Emulation EXT
SS Traveler 6807 T510
Gardens Prime Time
Gardens EXT 4137

The Green Garden Angus Sale

Monday April 7th

beginning at 1:00 P.M.

Dear Friends,

Welcome to the 44th consecutive Annual Green Garden Production Sale. It will be a pleasure having you with us April 7th to appraise our sale offering. Our commitment to the livestock breeding industry has changed little from our beginning in 1932. Our goal has always been to provide the commercial cattleman with problem-free seedstock that will make him the most profit.

The use of Estimated Progeny Difference (EPDs) has allowed us to provide you with a more predictable product. Since 1984, we have been aggressively stacking pedigrees to improve the predictability in our systematic approach to seedstock selection. This selection process gives you the opportunity to choose from a wider range of predictable products that can more accurately target the needs of your cattle operation.

For the past 16 years, we have been stacking positive carcass pedigrees and blending these genetics into our selection process. Today, you have the opportunity to make selections from seedstock that calve easy, grow rapidly to market weight, have a moderate mature size and hang up a superior carcass.

We endorse the guarantee adopted by the American Angus Association. And wish to add that we are interested in our cattle and desire to help you with any unforeseen problems related to your purchase.

We are looking forward to your visit. If we can do anything to make your stay more comfortable, please let us know.

The Janssen Family
Dick, Shelly, Ben & Elizabeth
785-472-3752

General Information

Special Representatives:

Mark Gardiner - Director of the American Angus Association
Stephen Russell - Sec./Fieldman, Kansas Angus Association
Randy McCabe - President of the Kansas Angus Association

Livestock Press Representatives:

Matt Caldwell - Angus Journal 785-256-4112
Doug Paul - Stock Exchange 405-840-3915
Steven Russell - Kansas Stockman 785-273-5115
Steven Russell - Kansas Angus Association - 785-224-8134
Guy Peverly - High Plains Journal 785-456-9911

Sale location: The sale will be held at the Green Garden Angus Farm, located 1 1/2 mile south of Lorraine, Kansas.

Accommodations: Best Western Garden Inn in Ellsworth, located at the US Highway 156 & 140 junction. 785-472-3116

Delivery: We are happy to assist with delivery arrangements, and will deduct \$50 off the purchase of any animal picked up sale day or the week of the sale.

Health: All animals will sell with interstate health papers available sale day. All bulls have been semen evaluated by Dr. Verl Carlson, Lyons Veterinary Clinic. Dr. Carlson will be on hand sale day to answer any health related questions about the sale offering.

Updated Information: Ultrasound carcass measurements taken by Dr. Paul Ritter, and calving information will be available by Sunday April 6th. All updated information will be posted on our website as soon as it is available. (www.greengardenangus.com)

Terms and Conditions: All animals will sell according to the terms and conditions of the American Angus Association.

Announcements: Announcements from the auction block will take precedence over information printed in this catalog.

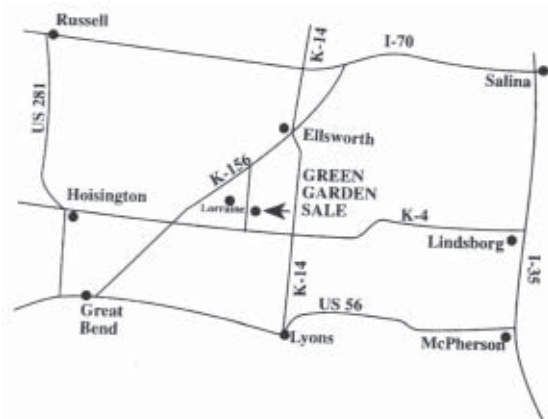

Lunch: A complimentary lunch will be served by the Smoky Hill Cattlwomen beginning at 11:30 A.M.

Sale Day Phones:

Sale Barn: 785-472-5335
Ben: 785-472-1164

Dick: 785-472-8761
Shelly: 785-472-8763

Auctioneer: Stanley Stout

"Best of Breed"

John Brethour and his staff at the Kansas State University (KSU) Ag Research Center-Hays (ARCH), Hays, Kan., the \$100,000 grand prize winners with an entry of 80 steers from registered Angus bulls worth an average of \$132.05/cwt. of carcass.

Congratulations to John and his staff!

On January 29, 2003, at the National Cattlemen's Beef Association national meeting in Tennessee, John Brethour was proclaimed the winner of the National Angus Carcass Challenge "Best of Breed" contest. This carries a cash award of \$100,000. There were 140 entries (pens of cattle consisting of at least 80 head/pen with some Angus blood) from across the US.

The top six entries all used the technology developed by Brethour to select their animals and to guide the finishing process to achieve maximum carcass grade. Moreover, Brethour personally trained most or all of the people associated with those 6 entries in the use of this patented technology.

There were eight *Green Garden* sires represented in the pen of steers that won the "Best of Breed" contest. The ARCH's reasearch cow herd were bred AI to Gardens Highmark, Gardens Bravo, Gardens Profit and Gardens OB45 9053 who was purchased in our 2000 Production Sale by Summitcrest Farms. The Roy Soukup Ranch had 19 head in the pen, sired by Gardens OB45 8281, Gardens OB45 884, and Gardens Prime Time 5091. The Bettenbrock ranch had 1 head make the pen, sired by Gardens OB45 870.

The results of the "Best of Breed" entry:

15 head sired by Gardens OB45 9053

Carcass Weight Ave.	Ribeye Area	Back Fat	Marbling Score	Yield Grade
832.43	14.14	.56	6.5 (Ave. CH)	2.86

11 head sired by Gardens Profit

Carcass Weight Ave.	Ribeye Area	Back Fat	Marbling Score	Yield Grade
845.30	13.23	.44	6.8 (Ave. CH)	2.30

9 head sired by Gardens Highmark

Carcass Weight Ave.	Ribeye Area	Back Fat	Marbling Score	Yield Grade
869.38	13.23	.52	6.0 (Ave. CH)	2.88

3 head sired by Gardens Bravo

Carcass Weight Ave.	Ribeye Area	Back Fat	Marbling Score	Yield Grade
774.33	13.70	.57	7.57 (Ch +)	3.0

19 head were from the Roy Soukup Ranch, Ellsworth, KS.

Carcass Weight	Ribeye Area	Back Fat	Marbling Score	Yield Grade
759.16	12.37	.48	6.81 (Ave. CH)	2.63

1 head was from the Bettenbrock Ranch, Geneseo, Kansas.

20 head were from the Martin Bland herd in Luray, Kansas.

Predictable Genetics from Start to Finish

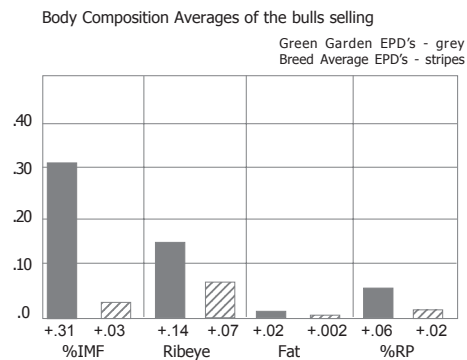

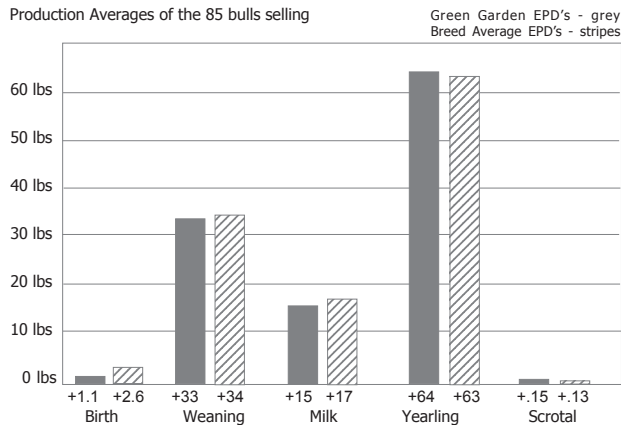

The Start: Calving Ease

In 1983, we implemented a program of stacking pedigrees to create a calving ease product, using an 18th century of breeding "like begets like". We used herd sires that were stacked four and five generations deep in low birthweight EPDs to bred to cows with similar genetic makeup and with production histories of low actual birthweights. This changed our focus from a strait performance program to product production for specific functions for the commercial cattle industry. In 1987, we applied this same concept to improve the final product composition of our seedstock.

Having a live calf is the first step, the second step is keeping expenses to a minimum. Realizing the two largest expenses in a cattle operation are cow maintenance and bringing replacement females into productions, we set up ten perimeters to guide our selection process.

- | | |
|---------------------------------------|--------------------------|
| 1. Birth weight EPD | 6. Semen quality |
| 2. Actual birth weights | 7. Milk EPDs |
| 3. Length of dam's gestation | 8. Mature size EPD |
| 4. Dam's calving interval | 9. Longevity |
| 5. Sire's daughters calving intervals | 10. Biological body type |

At Green Garden, our goal is to produce seedstock that will reduce calving difficulties, improve performance, reduce mature cow size, and increase final product value. Below are two graphs depicting how the EPD's of the bulls in our 2003 sale offering compare with the average non-parent EPD's in the Angus date base.

The Finish: Final Product - The Carcass Connection

If we look at growth EPDs as how quick we produce our product, then we must look at carcass EPDs as the kind of product we produce. At Green Garden it is important to produce seedstock that will improve the composition of the final product and to improve net profit. Using body composition EPDs and ultrasound scan data as selections tools, we have been aggressively stacking positive marbling EPDs. In our 44th Annual Production Sale, 100% of our offering will have positive carcass EPDs or will have been sired by bulls with positive carcass EPDs. Most are stacked several generations deep in positive carcass traits and are designed to:

1. Reduce days on feed
2. Reduce outside fat, reducing kill floor loss due to excessive trim.
3. Improve the consistency and palatability of the final product.
4. Produce a product that meets Certified Angus Beef qualifications ore better.

We were fortunate to have been selected by John Brethour, animal scientist and beef research specialist at the KSU Experimental Station in Hays, Kansas, to be part of comprehensive "start to finish" test comparing Angus sires to the high-marbling Wagyu breed.

Listed below are the results of the "start to finish" test. This trial involved progeny from Gardens Highmark, Gardens Perfection 719, Gardens Bravo, Summitcrest Scotch Cap OB45 (the reference sire), and a proven high marbling Wagyu bull.

	Wagyu	Angus
No. of Head	24	47
Average age of dam	4 Yr.	6 Yr.
Average % Angus in dam	47.40%	48.70%
Average weaning weight	520	576
Average Yearling weight	863	998
Average weight at harvest	1239	1335
Average age at harvest	508	474
Carcass weight per day of age	1.54	1.75
Average Marbling score	5.37	6.18
Average backfat, in.	0.37	0.46
Average REA, sq. in.	13.8	14.1

	Wagyu	Angus
Carcass yield grade		
YG1	29.17%	4.26%
YG2	58.33%	46.81%
YG3	12.50%	48.97%
Carcass quality grade		
Prime	0%	12.77%
CAB	50.00%	55.32%
Choice	20.83%	32.00%
Select	29.1%	0%

For retained ownership or for those who feed your cattle, quality grade and yield grade will generate the most premiums for product produced.

The Bulls that Sell

We are pleased with the set of 46 fall bulls we have selling this year. They have been grown out in a 100 acre pasture on a high roughage, low concentrate ration, with free choice prairie hay and are ready for service. The genetics represented in the grand champion entry in the "Best of Breed" contest, Gardens Highmark, (the #1 sire in the breed for % IMF EPD) Gardens Bravo, and Summitcrest Scotch Cap OB45 are found throughout this set of bulls. They scanned an average of 3.52 with .14 inch of backfat as compared to breed average of 3.50 with .28 inch of backfat. Their IMF EPDs averaged a +.32, putting this set of fall bulls in the top 3% of the breed. These bulls are bred to improve the composition of your final product as well as maintaining superior calving ease and good production EPDs.

Research indicates that EPDs for young bulls may be as much as 9 times more accurate for making selection decisions that adjusted individual data. The chart below represents how these bulls compare to breed average.

	Production EPDs					Body Composition EPDs

As many of you know, we collect several of the bulls at a year of age. We then use this semen in test herds to help in our data collection. This year again we will be retaining a 1/3 semen revenue sharing interest on all the bulls selling. In most instances, we will not exercise our semen option, but if for some reason we would like to collect the bull you purchase, we will do it at our cost and your convenience.

Spring Yearling Bulls

The spring yearling bulls are brought in after weaning and fed in a dry lot with a high roughage, low concentrate ration, with free choice prairie hay. This is an excellent set of bulls which have an average birth weight EPD of +0.7 while ranking in the top 3% of the breed for IMF EPD at +.30.

The genetics used in the "Best of Breed" entry are well represented in this set of bulls along with some we think are even better. Ultrasound and body composition scores done by Dr. Paul Ritter will be available by sale day. We will post them on our web site www.greengardenangus.com as soon as they get processed. If you have any questions or would like to view the cattle prior to sale day, just give us a call (785-472-3752).

Under each pedigree, we have included the age of dam to give you the opportunity to convert birth weights to a two-year-old basis.

5 year old cow through 10 years of age	Subtract	6.7 lbs.
4 year old cow to 5 years of age	Subtract	5.6 lbs.
3 year old cow to 4 years of age	Subtract	4.1 lbs.
1 1/2 year old cow to a 3 year old	Subtract	2.5 lbs.
2 year old to 2 1.2 year old	Subtract	0 lbs.

For example, take a 5 year old cow that had an 86 pound calf. To convert this calf's weight to a 2 year old basis you would subtract 6.7 lbs. In other words the same calf out of 2 year old heifer would have weighed 7.2 lbs.

Congratulations to Brandon New

Congratulations go out again this year to Brandon New on placing 5th in the Carcass Steer competition at the 2002 National Jr. Angus Heifer Show. His steer was a YG2 average Prime (MDAB 50 with .4" of backfat and a 13.8 ribeye). Brandon's Grand Champion Steer in the 2001 National Jr. Angus Heifer Show was a YG 1.77 with a quality grade of Prime (SLAB 10). Both steers were sired by Gardens Opto.

Congratulations to Roy Soukup and Jim Bettenbrock on being part of the "Best of Breed" grand prize winning entry. Roy had 19 of his steers purchased by the ARCH and Jim had one head that made the final cut for the prize winning entry.

Gardens Expedition, the top selling bull in our 1998 Production Sale, purchased by Stevenson/Basin, has taken his place as one of the most complete sires ever introduced into their program. Currently ranked the 8th highest ultrasound IMF EPD sire among proven sires of the breed, based upon data from 172 progeny scanned. Expedition combines outstanding carcass traits along with being in the top 1% of the breed for yearling EPD at +98. The dam of Expedition, Green Garden Gina 2268, is a featured donor cow in the Baldrige Brothers program in Nebraska.

Semen Available through ORigen

The Cows that Sell

The genetics available in this years sale offering will combine the efforts of 13 years of using ultrasound data as one the selection tools in improving our cow herd. Our goal is to produce cattle that calve easy, grow rapidly to market weight and hang up a superior product on the rail. The cows born from 1990 to 1997 were scanned by John Brethour, then from 1998 to the present we have been using CUPP technicians. The scores will differ in that John does not give a ribeye measurement or ratios and his IMF scores parallel the USDA quality grade scores (see chart below).

CUPP Scores

John's Scores

%IMF	Quality Grade	Marbling Degree	Marbling Score
3.1-3.9	Select +	Slight 50-90	4.5-4.9
4.0-5.7	Choice -	Small 0-90	5.0-5.9
5.8-7.6	Choice 0	Modest 0-90	6.0-6.9
7.7-9.7	Choice +	Moderate 0-90	7.0-7.9
